Overview

The **Libe Kiosk Machines** are ten standalone machines stationed throughout the library that are primarily intended to provide rapid access to the library's catalog.

The five kiosk machines located on the 1st, 2nd, and 3rd floors are very basic, *Mac OS* only machines capable of searching and printing.

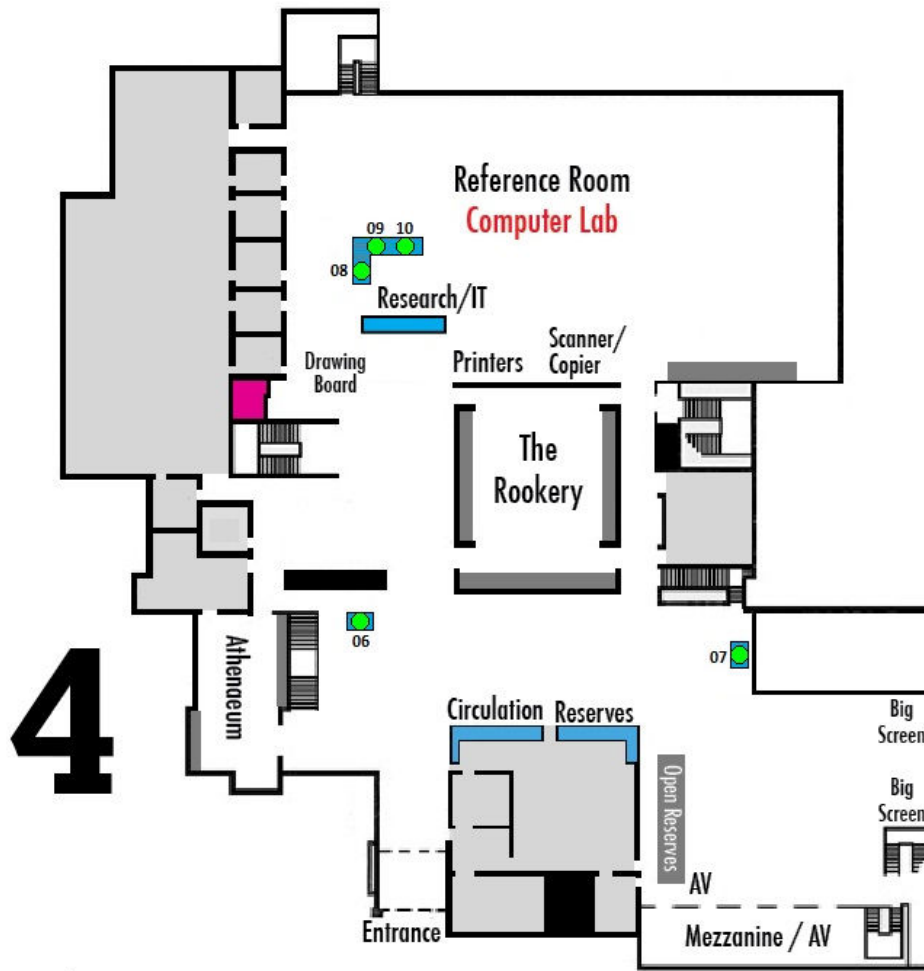

The five kiosk machines on the 4th floor also double as overflow machines for the lab spaces. As such, they have both *Mac OS* and *Windows 10*, have additional software matching the build on the Reference Room lab machines.

While these machines are not part of a lab as such, the *Kiosk* areas are treated as a [Public or Student Computing lab](#). As such, these machines are supported by the [ITS Helpdesk](#).
